Allestree. 1631.

¶ A New Almanack and Prognostication, for the yeere of our Lord God, 1631.

And from the creation. 5593

Being the third frō Leap yeere

Calculated and properly referred to the longitude & sublimity of the Volt Articke of 51 deg. 32. m.

Mutor pro temporū ratione.

By *Richard Allestree*.

London Printed for the Company of Stationers.

20

Ad huius Libri Prognestici amici sui charis: Mr.
R. Allestree Lectorem carmen Prognesticon.

Stelliferi secreta Poli non parua recludit,
& manifesta facit parvulus iste liber.
Vana superstitio nulla hîc, ars impia nulla,
ista licet rabido Zoilus ore crepat.
Cuncta Deo subsunt Cœlumq́, Solumq́, salumq́,
quaq́ iubet facient Sidera, terra, mare:
Prima Deus causa est, causæ sunt Astra secundæ,
nil, si prima velit, causa secunda valet.

H.B.

MVSEVM BRITANNICVM

Ad amicum suum charissimum Mr. R. Allestree de Libro hoc Prognostico.

Abdita stelliferi reserans mysteria Cœli,
quid signent nobis astra coruſca Poli:
Quid pluvias, ventos, tempestatesque sonoras,
excitet, his pulsis unde serena dies:
Ad sâ pietate, docet, namquè omnibus istis,
Causam Causarum tu facis esse Deum.

R.W.

A neceſſary and perfect rule for euer to know when the 4 Termes begin and end: and how many Returnes are in every Terme.

Eight dayes before a Terme ſhall be,
The Exchequer openeth certainly:
Except the Terme of Trinity,
Which openeth but 4 dayes before aſſuredly.

1 Hillary Terme beginneth the 23 day of January (if it be not Sunday) but then the next day after, and endeth the 12 of Febzuary, and hath 4 Returnes.

Octabis Hillarii	Craſtino Purificationis
Quind. Hillarii	Octabis Purificationis.

2 Eaſter Terme beginneth 17 dayes after Eaſter, and endeth 4 dayes after Aſcention day, and hath 5 Returnes.

Quind. Paſchæ	Menſe	Quind. Paſchæ.
Tres Paſchæ	Paſchæ	Craſtino Aſcentionis.

3 Trinity Terme beginneth the next day alwayes after Corpus Chriſti day, and endeth the wedneſday fortnight after, and hath foure Returnes. Note that Corpus Chriſti day is alwayes the Thurſday after Trinity Sunday.

Craſtino Trinitatis	Quind. Trinitatis
Octabis Trinitatis	Tres Trinitaits

4 Michaelmas Terme beginneth the 9 of October (if it be not Sunday) and endeth the 28 day of November, and hath 8 Returnes.

Octabis Michael	Craſtino Animarum
Quind. Michael	Craſtino Martini
Tres Michael	Octabis Martini
Menſe Michael	Quind. Martini

In this my Calender following, you ſhall finde, both the beginnings and endings of the Termes, and all the Returnes ſet downe vpon the dayes of the month that they fall vpon this yeare, 1631.

The Iulian, Soligenian, or English account for this yeare, 1631.		The Lilian, Gregorian, or Roman account for this yeare, 1631.

Sundayes after Trinity, are this yeare,	24	Dominicæ post Trinitatis.	24

Charles our Soueraigne King, did begin his reigne ouer Great Brittaine, Anno 1625. March the 27. & hath reigned 6 yeares compleat this yeare 1631. March. 26.

Veneris ingens sidus, cum ante graditur Solē φωσφόρος Græcè, Lucifer Latinè dicitur: Cum subsequitur, & ab occasu refulget, vesper, vespeurgo, & ἕσπερος appellatur.

This Golden Planet Venus is Occidentall, from the 11 day of February this yeare 1631. vnto the 29 day of November following, and so long this yeare she is our glittering Euening starre, setting after the going downe of the Sunne, and therefore termed Hesperus. vel vesper: that is, the Evening Star. And all the rest of the yeare else, she is Orientall, rising before the Sunne in the Morning, and therefore called Lucifer, and our glittering morning star, almost all this winter.

A most plain and easie Table shewing the true time of the beginning, continuance, and yeares, since the reigne of each King & Queene in this Land, from the Conquest, vnto this yeare, 1631. Gathered forth of Chronicles, and heretofore set forth by others for profitable vse.

The Kinges names.	Began their reigne.	The time they reigned.	Since their reigne.

Times of Marriage prohibited by the Church.

From	After Aduent sund.	till	The 12. of January.
	After Septuagest.		8. dayes aft. East.
	Ascention day,		Trinity Sunday

A true definition of naturall Astrologie by the Author.

Astrologia vera ac erudita physicæ pars est, inquirens proprietates, vires, effectus ac significationes stellarũ, quas in elementari natura & microcosmo excitant, non quidem curiosè & superstitiosè, sed verarũ observationũ & rationalis experientiæ testimoniis, idq; per certas hypotheses artisque principia & Phænomena. Horum principiorũ naturã & demonstrationẽ generalẽ ob oculos ponit doctrina Sphærica. Est enim cœlum vehiculũ divinæ virtutis, quo, mediante motu & lumine stellarũ tanquam causis secundis, Deus cuncta hæc inferiora gubernat & disponit. Non tamen necessitant absolutè, sed conditionaliter, & inclinant fortiter.

In the 7. or laſt colum of this my Almanacke towards the right hand, you haue the houre and minute of the Sunne riſing for euery day in the yeare at London: which houres and minutes are halfe the length of the ſame night. For example: the 5 of Ianuary, the Sunne riſeth at London, at 8 of the clocke, and no min. after that length being doubled, makes 16 houres and no minutes, the length of that. And to know the time of the Sun-ſetting in the ſame place through the yeere, take the houres and min. found in the Almanacke for Sun-riſing from 12. and you ſhall haue the Sun-ſetting left: which being doubled, is the length of that day. Example: Ianuary the 5 day aforenamed, the Sunne riſeth at 8. and no min; take 8. from 12. and there reſteth 4. houre of Sun-ſet that day, the houre of 4. being doubled maketh 8. houres, the length of that day, and ſo of all the reſt. This is very eaſie.

The dayes of the Month.	Weeke dayes.	Feastiual daies in vse for Law dayes, keeping of Faires, &c.	The place of the ☉ he is in the Zodiak euery day at noone.	The Aspects of the Moone with the Planets, or her voyd of course, fit for Physicians, Chirurgians, &c.	Full Sea at London bridge.	The houre and min. of Sun rising at London.	The houre and min. of Sun setting at London.

The Springs approach, renewes the verdant Meade,
Refines the blood, and vitall spirits breeds:
Lament (O man) because there is so few,
That d'offes the old man, and puts on the new.

Tellus awakes from sleepe, and now is seene,
(In spite of Winter) clad againe in greene:
Wake sluggish-man, lest thou be taken napping,
By Sathans Dormitives, thy sense entrapping.

Now quench your fragrant thirſt with fragrant wine,
Both when you ſup, and likewiſe when you dine:
Ingurgitate not too much, but keepe a meane,
For many draughts, will make a fat man leane.

With clothes keepe body warme, as hiues do Bees,
But warme it not too much, with Tinkers frieze:
Which often makes ill Liuers, breeds Catarrhs,
And kindleth Sodaine flames of furious Iarrs.

A Tide Table, whereby is easily found the time of full Sea, at the cheefest Ports, in and adioyning to this Kingdome.

For these places adde houres and minutes.

Barwick, S. Mat. Font. Ostend, Blackend.	0,45
Frith, Leith, Dunbar, Month, Egmo, Nat. Silly.	1,30
Falmo, Garnsey, Iballo. S. Malo, Tinby, Lizard.	2,25
Foy, Waterford, Yoghal, Cozke, Kinsale.	2,25
Lin, Humber, Weymouth, Darem. Lime, Hale.	3,0
Wontbray, Antwerp, Hanbor. Bristol, Lamion, Fulnes.	3,0
Milford, Bridgwa. Exwater, North-coast of Engl.	4,30
Portla. Peterport, Harflew, Hag, Blanchey.	5,15
Orkney, Pool, S. Ellens at the flee, Emden.	6,0
Deepe, Needles, Calact, Lur, Lenoy..	6,45
Bullen, Dover, Harwi. Yarmouth, Liest. wight.	7,30
Orfordnes Norforthland.	7,30
Callice, Calshot, Rye, Winchesley, Gore-tne	5,14
Lands-end, Southampton, Dunborow, Portsmouth.	9,0
Willins, Flanders, Spits, the Sluce, along the Swine.	9,0

But contrariwise. for these substract Hou. and Min.

Redban. Aberdin, the west end of the Noze.	2,13
Graues-end, Downes, Tenes, Rumney, Ramkins.	2,30
Dundee, S. Andrewes, Lisbon, S. Lucas.	0,45
Tinmo, Hariepo. Cadiz, Gascoigne, Brittaine.	0,0
Biskey, Galizia, Portugall.	0,0

The vse of this Table is easily had, by adding or substracting the houres and minuts from the time of the full sea at London bridge, noted in the diarie of my Almanacke, in so doing it sheweth you the time of full-sea in all these places above noted: with this Caution, that Winds, Land-floods, the Moones Latitude, may bee an hinderance, or fortherance of the time, an houre more or lesse.

An Appendixe vnto the Precedent Almanacke, for *this present Yeare of Grace.* M.DC.XXXI.

Wherein you may Obserue a briefe Chronology of Yeares: A Declaration of all the Eccliplses of the two great Luminaries, which are to bee seene this Yeare; (if the Ayre be cleare.) Astronomicall Calculations: Some Physicall notes; and notes of Husbandry, and Gardning; with a Cronography of the foure Quarters of this Yeare.

Vsefull and pleasant for all those which are desirous (and holds not vnlawfull) of such a Worke.

By *Richard Allestree.*

GOD maketh Lightning with Raine, and bringeth forth the Wind out of his Treasures. Iere. 10. 13 Thus Nature is an Order prescribed, and set downe by GOD too.

LONDON:
Printed for the Company of Stationers 1631.

Vpon what Dayes the Fayres of the Burrough of *Derby* are to kept, this preſent yeare, 1631. as followeth.

1. The firſt is vppon *Fryday* in *Eaſter* Weeke.
2. The fift and ſixt dayes of *May*.
3. The *Fryday* in *Whitſun-weeke*.
4. The xvij. day of *Iune* being *Friday*
5. The 25. day of *Iuly*, being S. *Iames* day.
6. The 26. and 27. dayes of *September*.

A Compendious Chronology of yeares, Expired within the Compasse of this present Yeare. 1631.

Since the Comet or blazing Star, from the 18. of Nouember, anno 1618. till the 16 of December.	13
Since the happy returne of King Charles from Spaine. October 6.	8
Since the last great Earth-quake in England. 1626.	6

Euphe-

Euphemismus, or *Boni ominis Captatio*. Also some Astronomicall Calculations for this present Yeare. 1631.

A Declaration of all the Ecclipses within this present Yeare of Grace. 1631.

There will be foure Eclipses of the two great Luminaries, this yeare 1631. two of the Sunne and two of the Moone, but the first of the Sun onely, and the two of the Moone will be seene vpon our Horizon (if the Ayre be cleare) the latter of the Sunne not. The first Eclipse of the Sunne is like to be seene of vs in England the 21 day of April (but beyond the Sea, the first day of May,) two minutes before 9. a clocke in the morning: both the Luminaries sojourning in the 10. degree and 3. min. of Taurus, not much before the Dragons head. The digits Eclipsed are 3. and 6. parts. The duration is one houre, 10. minutes, the vpper side of the Sun being darkned by the Opacous body of the Moone.

The first Eclipse of the Moone will be very conspicuous in England, Scotland, and Ireland, just at Sunne setting; for the Moone will rise Eclipsed: It will be obiected to our sight the 5. of May being Thursday, according to our English accompt, (but vpon the 15. day of the same moneth, according to the Romane accompt.) This totall Eclipse beginning 17. min. past 5. in the afternoone, totally darkned 18. min. after 6. at night: in the middle of her darknesse at 7. min. after 7. a clocke. The beginning of her recouery of her borrowed light, 4. min. before 8. and the end of her darknes at 3. min. before 9.

The second Eclipse of the Moone will also be a totall Eclipse, which will be obiected to our sighes the 29. day

of October being Saterday, according to our English accompt; but the 8. of Nouember according to the Roman. The Moone will beginne to be intercepted by the Opacous body of the earth the day afore-layd, the beginning is at 45. minutes past 8. at night, the beginning of her totall darkneſſe at 3. minutes before 10. a clocke. The middeſt of her darkneſſe at 7 min before eleauen. She will end all her darkneſſe at 2. minutes after one a clocke in the morning.

Saturne mooueth in his Retrograde motion from the 16. day of February, to the 6. of July, from thence vnto the end of the yeare direct.

Iupiter is direct from the beginning of the yeare to the 28. of July: Where he beginneth to be Retrograde vntill the 23. of Nouember, from thence to the yeares end direct.

Mars mooueth according to the succeſſion of the ſignes all the yeare, vntill the 9. of December.

Venus is direct from the beginning of the yeare to the 8. day of Nouember, from thence to the 18. of December direct: then againe Retrograde.

Mercury is Retrograde from the 21. of February to the 16. of March. And from the 19. of Iune to the 12. of July: And from the 12. day of October to the 3. of Nouember, and all elſe he is direct.

Note, that one degree of Latitude in the Skye, doth anſwere vnder the Aequinoctiall to 60. miles on Earth. A degree in the Orbes of Heauen, is a rate of proportion, and doth ſignifie the 360. part of a Circle. They that dwell vnder the Aequinoctiall Line haue their longeſt day in the yeare but 12. houres. A day naturall includeth in it the night alſo, and both together contayne 24. houres. An houre contayneth 60. min.

The longeſt day with them at Ward-houſe, where the Pole is eleuated 71. degrees, and our Trauarers that go into Moſcouia do touch in their Voyages: I ſay their longeſt day in the yeare is 73. of our dayes long together without any night betweene, which day contayneth 1752. houres in length: Which time of the yeare is from the 6. of May, vntil the 18. of July. The length of the day with them that dwel vnder North-Pole, is in length halfe of our yeare together without any night between: The other halfe of their yeare, is all night together without any day betweene.

And

And in Greene-land the Sunne ſetteth not in 2300. houres long, which is in length 95. dayes and 20. min. Yea, heere in England the ſelfe ſame day differeth in length, as appeareth at theſe places following.

At { London / Derby / Yorke } the longeſt day in the yeare is { 16. hou. and 26. minut. / 16. hou. and 44. minut. / 16. hou. and 58. minut.

Thus you may ſee there is 32. minutes of an houre betweene the longeſt day in the yeare at London & York.

A Cronography of the foure Quarters of this Yeare. 1631.

1. The Hyemall Solſtitiall, or Winter Quarter, beginneth Aſtronomically, the laſt yeare 1630. December the 11. day, 5. houre, 35. min. 00. ſec. at what time the Sunne entreth into the firſt min. of the imaginary ſigne of cold and earthy Capricorne, being then declined from the Aequinoctiall, according to the obſervation of Tycho de Brache, 23. degrees, 31. min. 30. ſeconds to the Southwards: at which time the dayes be at the ſhorteſt, and nights at the longeſt with vs.

2. Æquinoctium Vernum: Or our Spring Quarter, beginneth naturally with vs Aſtronomically, the 10. day of March this yeare, 56. minutes after 5. afternoone: at what time the neuer reſting Sun entreth into the Aequinoctiall ſigne Aries, making the day equall with the night, to all the World.

3. Solſtitium Aeſtivum: or our Summer quarter with vs according to Aſtronomy, beginneth the 11. day of June, 9. houre, 56. min. afternoone: at which time the Sun entreth into the firſt min. of the imaginary cold, & moyſt ſigne Cancer, then making his greateſt Northern declination, making then our longeſt day and ſhorteſt night in all the yeare.

4. Autumnall Aequinoctiall, our Autumne, or Harueſt Quarter, beginneth according to Aſtronomy the 13 day of September, 32. min. 45. ſec. afternoone, at which time the Sun entreth the firſt ſcruple of the imaginary hot, moyſt, and dry ſigne Libra, which maketh againe our nights and dayes equall, or alike.

Some few *Physicall* Notes and Obseruations.

THy World consisteth either of things inuisible, as of Angels, and Spirits: or visible, as the Heauens, the Elements, and the bodies compoſed of the Elements. So then if the foure humours do exceede or alter that proportion in mans body (that God created them at the beginning, either in quality, or quantity, then shortly after commeth diseases and sicknesses, and so the body decreaseth.

We may assure our selues that it is true, and that the Moone hath vnder God, as a second instrumentall cause, superiority and domination vpon the foure humours of mans body, as Choller, Blood, Fleame, and Melancholly: Doctor Dee in his 103 Aphorisme, sayth thus: Luna potentissima est humiditatum rerum moderatrix humiditatisq; excitatrix & effectrix. So that the best doctors do hold this opinion, that all the infirmities which naturally come to any man (and not by any mis-chance, or suddaine accident) doth proceede and come by the distemperance of the foure humours: so wee may well conclude, that if the head of a Fountaine doth alter his course, or be infected, then the adiacentiall, or belonging streames must needs differ either in quality, or quantity. So likewise the Moone, being of a passiue quality collecteth and retayneth the good or euil influence of that Planet to whom she is adioyned or applyed, aswell the Sunne, as wee see by prognosticatory night in the yeare, As that famous Philosopher Hermes sayth in his Iatromathematicks: Linæ vero stella (siue benifica siue malefica fuerit) vtri se applicuerit, illi suffragabitur. And because her Orbe is nearest vnto the earth, shee lendeth vs to owne the vertue and influence of all the other Planets: and so causeth the mutation or alteration of the Weather: and of mens bodies, to health or sicknesse, this or that, according to the nature of the Planet, with whom shee is adioyned or configurated, and the part

of

of the Zodiacke wherein ſhe is ſituated. Dicet Hippocrates, quod medicus primo aſpiciat Luna, quando eſt plena lumine, quia tunc creſcit ſanguis & medulla in omni homine & medulla in beſtijs omnibus, & ogmentem in Mari, & in cunctis mundanis rebus. And Ariſtotle ſaith, Deus & natura nihil agunt fruſtra: God and nature haty done nothing in vaine. And I will giue one reaſon more, If any thing vpon the earth, reaſonable, ſenſible, or naturall, were of one Element alone: No ſickneſſe could hurt it, nor diſeaſe corrupt it, but euery compounded liuing thing vpon the earth, ſeeing it haty had a beginning of the foure Elements, it muſt needes of neceſſity dye.

Theſe words before written, doth not fruſtrate the words of the Holy Ghoſt, ſpoken to Adam: In that day that thou eateſt thereof, thou ſhalt dye the death. For theſe words: The ſame ſoule that ſinneth, ſhall dye. Where the efficient cauſe of Death, I faithfully beleeue is ſinne. The afore ſayd, euidently teacheth, that wee may take an occaſion lawfully vpon this matter, to come to the true Aſtronomy, and Aſtrology of Chriſtians, which is to contemplate the glory, infinite power, wiſedome, goodneſſe, mercy, and loue of our Almighty God by his great worke of the Heauens. The Heauens declare the glory of God, and the earth ſheweth the worke of his hands, &c. Theſe are not as the Heathen, or the Stoickes, that beleeue in the Planets, and taketh them for their Gods, and truſteth in them. The afore-ſayd things being well conſidered, as they are ſayd in briefe. Let Phyſicke and Aſtrictions bee miniſtred on ſuch dayes, and aſpects of the Moone with the Planets as followeth, if you can know when they be. But aboue all remember this: Medicus ſoſtinam requirit: That is, when the Phyſition is not payd, the diſeaſe goeth backe-ward.

If therefore you deſire to helpe, ſtrengthen, or comfort the Vitall, or liuely power, whoſe ſeate is in the heart, you muſt vſe things temperately hot and dye, or hot and moyſt, and at ſuch time as the Sunne is ſtrong, and well affected with the friendly beames of Iupiter and Luna.

The naturall Vertue gouerned by Iupiter, Venus, and Luna, and ſeated in the Liuer, wherein are ingendred the foure humors (ſpoken of before) and is

nouriſhed

fortified especially by Iupiter, in vsing hote and moyst things, at such times as Iupiter is well disposed in the Horoscope, or configurated with Venus, and the Moone being fortunate

The animall Vertue distinguished into the intellectuall part which Mercury gouernes, is the sensitiue which the Moone with Iupiter and Venus doe rule, and is best comforted vnder the afore-sayd Planets well disposed, and with medicines temperate, and agreeable to their natures.

The Vertue attractiue (one of the foure lesse principall and subseruing vertues) reioycing in the heate and drinesse, and is fortified by things of hote nature, the Moone passing vnder Aries, and Sagitary, and well aspected of Sol, or Mars fortunate, or the Moone in any other signe so aspected, and Aries, or Sagitary ascending in Domo vitæ.

The Vertue retentiue delighteth in colde and drye things by the influence of Saturne, and is best comforted, the Moone seated vnder Taurus, Virgo, or Scorpio, and applying with a friendly aspect vnto Saturne, or the moone in another signe so aspected, and eyther Taurus or Scorpio ascending in the East poynt.

The Vertue digestiue is best strengthned by heat and moysture, and the influence of Iupiter, and is best holpen when the moone is vnder Gemini, Libra, or Aquary, and aspected of a friendly Planet, or if she be in some other signe, then it is fit that eyther Gemini, Libra, or Virgo, be rising in the ascendent.

The Vertue expulsiue delighteth in coldnesse and moystnesse, and that by the influence of the moone well affected, and placed in Cancro, Scorpio, or Piscibus, while one of these signes are ascending. Giue any medicine that is good against woormes, a day before and after the new moone: The like time vse for Cataplasmes.

These things are apparent enough to well qualified Phylosophers, Phylitians or Chyrurgeons to proue, that the Elements, Sunne, Moone, and Starres, are instruments, and secondary causes to worke vpon all compound bodies, vnder the othe of the Moone. The Heauens cause the earth to fructifie, and the Clouds drops fatnesse. And the Phylosophers layth: Causa causæ est etiam causa causati.

Certayne

Certaine brieſe Rules for Husbandry, Gardning, &c. ſuperſtitiouſly attributed to the Moone, mooving vnder the 12. Signes of the Zodiacke.

Salomon ſayth: To all things there is an appointed time, and a time to euery purpoſe vnder the Heauen.

AND Aſtrologers ſay, before you plant or graft, &c. conſider the Wind, for if it be in the North, or Eaſt, it is perilous. And I ſay: for the planting, ſowing, ſetting, feeding, and preſerving of ſundry things, that places, and times of different nature and quality, are to be choſen and obſerued: Non omnis fert omnia tellus. And ſo the premiſes conſidered, you may plant, and graft the moone increaſing, in Tauro, Aquario, or Capricorno; (and the beſt of all vpon Shroue-tueſday:) Creſcens enim Luna humorem auget & corpore implet: Decrescens minuit & exhaurit. Good to lib or geld Cattle, when the ſigne is in the Head, Thighes, or Knees. Good to ſow or ſet all kinde of Corne, and Seedes, the moone being Extra impedimentum, in the Head, Breſt, Belly, Reines, or Knees: The moone in Tauro, Virgino, or Capricorno, and in ✶, or △, aſpect of Saturne. To ſow or plant in Gardens, or caſt into the ground, to Digge, Plow, or Delue, and to dreſſe your Vines, if you ſow in moyſt ground, or the Nature of your Seedes be moyſt, the time is beſt after the full moone, if it be dry, it is beſt in the increaſe: But the Seedes whoſe roots

rootes beneunt must be sowne, as Onions, Cabbages, or Turneps, &c. three or foure dayes before or after the full moone.

Gather Apples and other Fruites, Hearbes, and Flowers, to haue them in most beauty, and greatest vertue, the moone at the full. Sow or set Garlicke, Lettice, Parsnips, Carrets, Peale, and Beanes, two dayes before or after the full moone. Sow Iuedes, or hearbes for store, in the increase from February vnto June. Good to fell Timber for building, in the wane of the moone, for the auoyding of Wormes, from Midsummer vntill Ianuary.

Good to plash hedges, fell wood to burne, that the Stocks may the better grow againe, the moone increasing in Ariete, or Libra. Cut Vines in February, or March, the moone in Ariete, Tauro, or Libra.

Remoone Trees in the same Signes all the last quarter, in Nouember, September, or February. Dung your Land, that the weedes may not abound, in the last quarter. The moone in Libra, or Aquario, is good to till the Gardens, and also to sow or set it, to set plants, and also to make a Hop-yard, or to set Hoppoles. Kill fat Swine neere the full moone, for the fat, the better to indure the boyling.

Good for ablactions, or weaning of Children, about the full moone, or the moone Vac. curs. to make them the more willing to forget the Pap, or Nurse.

Hee that is cast into Prison, or shall fall into any sicknesse, or bee sore wounded, the moone being in Tauro, Leone, Scorpione, or Aquario, hee is not like soone or easily to come forth, recouer, or bee healed. A promise made will not lightly be kept, and rumours brought first to ones eare, when the moone moueth vnder Aries, Cancer, Libra, or Capricornus, will commonly proone false. Dei igitur altissimi cœlum instrumentum, quo inferiora agit ac mouet, impellit, regitq; For my part, I doe attribute nothing to Time, Starres, Aspects, and foure Elements; but all Honour, Prayse, and Glory to the Almighty, that made them all; and so vse them like as maisters of Physicke, and Surgions, or rather Chyrurgions do their Apothecary Drugges, medicines, and Cataplasmes: For when they doe vse them to their Patients, they are not sure that they will take effect: Neyther do we or they say, this shall come

to

to passe, or that medicine shall take effect. And both they and we for ought that I know, do deale with nothing else, but by Gods direction, and with his naturall and good Creatures. I do know, and also doe beleeue, that Almighty Gods gouernement of the Heauens, Starres, and Elements, taketh not away the lawfull vse and meanes of this secondary causes, (instruments, and good Creatures. (as some would haue it) but they may stand euer together to the worlds end.

Soli Deo sit gloria.

An Abstract of a Direction, concerning Reall Contracts.

WHosoeuer shal desire to purchase, or put to Sale, to take in Lease, or let to Farme, to Grant, Assigne, Exchange, or otherwise to Contract, or Deale, with or for any Lands, Leases, Rents, Annuities,

mities, Mantion-Houſes, Offices, ſaleable, or other Eſtates of what Yeerely value ſoeuer, or to ſaue any ſuch from danger of Forfeiture, thorough the want of preſent mony. May either in their owne names, or in the name of any other truſted by them, haue ſecure meanes with all priuacy requſited, for the ſpeedy effecting what ſhall be deſired, in any the Caſes aforeſayd, or the like. At the Porcht-houſe againſt Saint *Andrewes* Church in *Holborne*. LONDON.

God ſaue our gracious King *Charles*.

FINIS.
